Class Assignment – XML
Maximum Points: 10

Work Individually. Follow all instructions.

Assignment:

For this assignment you are asked to create an XML document.

Company A wants to upload information to a server about their customers. The server database will store this information for various uses. Create a sample XML document (with data) that would represent what Company A might upload. Be sure your document is well formed.

Name your document prefaced with your last name e.g. fletcherXML.xml

Submit your file as a pdf via Moodle for credit
